SENOR

Senor's Kitchen Display System (KDS) displays order information clearly and effectively in a fast paced kitchen environment.

As a fanless & ventless terminal, it is protected from water, dust, steam and grease. Its aluminum die-cast casing dissipates heat all round, offering protection from extreme temperature and humidity that is commonly present in the kitchen setting.

The KDS can also be used as an industrial grade panel PC terminal, offering solid-state device with no moving parts. Its robust & solid physics greatly extends the hardware life, as well as enhances reliability & performance in all harsh surroundings.
